

Syntax Bildergalerie

Syntax

A basic gallery can be added by selecting a [namespace](#) like this:

```
{{gallery>namespace}}
```

All imagefiles in the selected namespace will be added to the image gallery.

You can define the wanted thumbnail size by adding its dimension as parameter:

```
{{gallery>namespace?150x150}}
```

The default is a dimension of 120×120 pixels.

You can define the number of columns as well:

```
{{gallery>namespace?6}}
```

The default number of columns is 5. If you specify a 0 no table is used instead all thumbnails are added in a sequence.

To have the filename displayed below the thumbnails add the `showname` parameter:

```
{{gallery>namespace?showname}}
```

If you want the files sorted in the reverse order use the `reverse` keyword:

```
{{gallery>namespace?reverse}}
```

If you don't want to link to the image detail pages but directly to the image itself use the `direct` parameter:

```
{{gallery>namespace?direct}}
```

For fancy JavaScript based inline browsing of the images use the `lightbox` keyword ¹⁾. This feature implicitly sets the `direct` parameter.

```
{{gallery>namespace?lightbox}}
```

All params can be combined:

```
{{gallery>namespace?150x150&6&showname}}
```

¹⁾

This feature is based on the [Lightbox](#) and [Lightbox Plus](#) scripts with some additions
