

BiwiWiki S5 Slideshows

Creating Slideshows from BiwiWiki pages

using the S5 plugin

erste Folie

Punkt 1

Punkt 2

S5 - Introduction

- S5 is a web based slide show tool
- Created by Eric Meyer
- Based on CSS and JavaScript
- Works in all modern Browsers

S5 in DokuWiki

- can be installed as a plugin
- allows you to create presentations as DokuWiki page
- using BiwiWiki's syntax
- The presentation is a normal BiwiWiki page

How to create

- Just follow some rules
  - Start with a H1 headline → the welcome page
  - H2 headlines create new slides
  - A horizontal line switches to the handout (only displayed in print)
- Adding the ~~SLIDESHOW~~ will create a link to the presentation mode

---

Additional content for handout

How it works

- The plugin uses a new feature called pluggable renderers
- DokuWiki's parser outputs the parsed syntax with the use of so called renderers
- The S5 plugin inherits from the default XHTML renderer and adds Eric Meyer's CSS and JavaScript Magic

Customizing

- Choose from seven premade themes or put your own in the template ui directory

Summary

- No more PowerPoint
- Creating presentations in BiwiWiki is easy
